

Pro Series

Our best quality for heavy duty waste management

Environmentally friendly and strong refuse sacks

- Specialized factory in Norway - focused production of refuse sacks of 100% recycled plastics. Many years of experience specialized in refuse sack production provides sacks of high and consistent quality.
- Plastic waste is collected in Norway and recycled in our recycling factory in Folldal, Norway. Proprietary technology with a unique raw material mix provides films with extra strength to the waste sacks. Pro sacks can carry up to 35 kg.
- Large environmental benefits with use of recycled plastics compared to new plastics and factory waste.
 - 90% less CO₂ emission
 - 80% less energy consumption
- 100% recyclable.

Standard package, 10 pcs/roll
